

This is a general overview of what companion plants work with the 'what to grow when' list of vegetables you can find on the Home Grown website. Again, this list is definitely not exhaustive and it is always worth doing a little research as well as each patch needs to be individually considered. The list has been arranged so the produce gets the main benefit while the companion plants support it.

Produce

Companion plants

Artichoke (jerusalem)	Rocket, Borage, Cabbage, Calendula, Onion, Peas, Sunflower, Tarragon, Thyme
Aubergines	Basil, Bean, Pepper, Marigold, Peas, Borage, Cabbage, Chives, Mint, Nasturtium
